constructe only such charges as the description of the sum of the country and it would construct the country and it would be interesting to know how small apper time.

Meanwhile the national regulation committee has done so under oath. He says that no such the say of the national regulation committee has done so under oath. He says that no such fand and here as to although the the same time to be in existence are those which are described in such the regulations committee. At the same time the regulations committee has the same time that t

COALING NEW ENGLAND.

some coal. The appeal in fact seems to recred to the belshowlid while the parley or till amount amount the country at Minsk was underway. They will be in a better position to back up their and from the southern state it is noticed that the solution of the figure of the maked to have some of the figure of the figure of the priority order. The inference to be gained from the North Carellan request to the interstate with Carellan request to the interstate with resolution is that New England in being instally favored and as the being install allowing the military successes to undertake the solution of the to some hear of that the bolishevikl have been crushed, that they are without ones again for a fighting spirit, but ones again for an install that it can insist upon its right with rood prospects of getting them ones that it can insist upon its right with rood prospects of getting them ones that it can insist upon its right with rood prospects of getting them ones again Poland appears to be so situnder the property of the priority order.

New England well knows what it is not to be able to get enough coal to keep the able to get enough coal to keep the able to get enough coal to keep the wheels of industry going and it certainly doesn't expect that others will be insufed unfairly in arder that it may be served, but if fully realizes how much infinitely it has been having in getting its requirements met without seed, he applicable it is not going to be required to some the south essecially at this season of the year hopins to holler for chall. It is understood that New England is claim for territory to its ethnographic lines.

time Euch provisions can hardly be considered necessaries in the southern that the southern is not leadly the necessaries by a New England win-really wanted which may mean that ter. Southern states can get coal in they are unable to come back. lanuary or Pehrnary as easily as now. New England and the northwest cannot. Thus while North Carolina should not be, and it can hardly be believed that it is deprived of sufficient conline meet calating needs, the putting me of a howl because sensible attention is being directed to the kind of service that should be given northern states resms to be a case of much ado about nothing that la unreasonable.

PRODUCING OUR FOODSTUFFS.

Much has been said about the need of getting back to the farm and of in-creasing the production of foodstuffs to respector of persons, while speed under keep pare with the growth of the country. New emphasis has been given to the short age of farm labor as the result of the rush of those emphasis. A scientist now declares there are no in the country to the cities to get the by the industries during and following there to find out hasn't made the start there is the report which has just been made by Professor Walker of the Uniterrity of Kansas, head of the research attitude of the coal miners who are decommittee for the central part of the decimality for the American Society of Mechanical Engineers who believes that the injustice in an attempt to force unjust stationary population of the middle west concessions, agricultural states and the difficulty in securing farm labor are threatening the food supply of the nation.

ferred in should not cause it to be pans- those who a sel over lightly. It is to be recalled that what to do. during the early months of the year there was much anxiety over the claim

help enough to even keep it up to ave-There are instances where production has fallen off as an ticipated, but there have been others where it has shown large gains so that as good if not better than average con-ditions are going to result. Crops have turned out well, but weather and other onditions were apparently working in armony to make it possible:

that it can be relied upon to do so from year to year. The fact is that we can-not reasonably expect to get increased production of foodstuffs if there is going to be a steadily decreasing interest nd participation in such activities. And reports such as Professor Walker with he setting forth of the opportunities that exist in that direction should awakn an interest that will bring relief to he situation, and guard against the day of Inadequate provision for our needs.

LAX ENFORCEMENT.

When such strong efforts were being made in behalf of national prohibition, previous to the passage of the prohibiion amendment, the claim was frequenty made by the opponents that even if ing."

THE REJUVENATION OF HATTIE

"Ted Stone's coming for me at 2," could manage the trousseau in that time, said Julie, complacently smoothing the dear?" ruffles of her crisp ping organdle frock. Her sister, Ruth, rocking lazily in a chair on the plazza, glanced at her wrist watch. "I expect Jack about quarter past—we're going out as far as the Rosecroft Tea House, but we'll be back Because it was secured this year with for supper. Where are you going?" shortage of farm hands does not mean "If that isn't the limit!" was Julie's xclamation. "Here comes Cousin Hat-

> You would never have guessed that the woman coming up the walk was re-lated to the winsome Morton girls. Although it was a hot Sanday after-noon, she wore a heavy dark skirt, with voluminous pleats, not the current sea-son style of pleats, but the decade ago variety. It was one of Cousin Hattie's axioms that if clothes were saved long enough their second cycle of modishness would come in due time. .

"You'd think she'd melt in that high necked blue waist-and where does she get her hats?" groaned Julie, as the girls watched their cousin's approach. "Oh, please don't Julie, dear," re-monstrated Ruth, "Even if she is deaf, she might understand what you're say-

whether it came as a surprise to the unitry or not prohibition was obtained had made her a not-to-welcome visitor.

Ruth blushed and murmured softly. "But, Jack—I-I'd love to, you know, but I'm making most of my things, and it takes so long—and," her voice trailed

away for sheer happiness.
Jack accepted her silence for cons out a feminine listener might have been able to interpolate between Ruth's words and know that she was longing for a nore elaborate trousseau, but could not afford it. And if the listener had been a relative, she would have known that that Rua did not like to ask for addiulle's seiflah demands for a fashionable ummer wardrobe had been so insistent ional clothes, as the Morton finances were none too abundant.

That night at supper Cousin Hattle orung her big surprise. Julie had just easingly asked her sister how she en-yed the auto ride of the afternoon. cousin Hattie put down her fork delibertely and answered while the others star-d in blank amazement. "We had a most enjoyable time Julie,"

she gaid. 'It's the first time I've ever had a pleasure ride like that, and it isn't going to be the last. I'm thinking of buying a roadster of my own, and perof huying a roadster of my own, and per-haps Jack will teach me how to run it. No I'm not too deaf to run an auto, the Lord be praised! That operation I had performed last year was entirely successful, but I thought it would be an interesting experimant to find out just what people thought and felt about me. Perhaps it was a mean thing to do, but It has been fillumination, to say the It has been filuminating, to say the least. And I'm not as poor as you all have thought. Father left me well provided for," She paused to look around her, then smiled at Ruth and went on. "But first of all, I'm going to carry, Ruth off to New York with me, if she'll come, and we're going to buy the pret-liest trousseau in the city. Then she's going to help me pick out, well, not exgoing to help me pick out, well, not ex-actly a trousseau, but I'll get almost as much pleasure from it. You folks won't know me when I come back!"

And they didn't! At the Cunningham-Mucton weedding, colebrated six -weeks from that day. Ted Stone's mother whis-pered confidentially.

CONTINUED GROWTH IN

EXPORTS OF MANUFACTURES Manufac res continue the chief characteristic d, our export trade. They have formed, says a statement by the National City bank of New York, 52 per cent of our exports in the current calendar year, and in the months of May and June 56 per cent, as against 43 per cent, in the per cent as against 45 per cent in the same months of last year. The total value of manufactures exported in the calendar year 1920 will, says the bank's statement, be not only the largest ever recorded but will considerably exceed \$4,000,000,000 as against slightly less than \$1,600,000,000 in the calendar year

Details of the distribution of manufact ures in the fiscal year 1920, which are low at hand, indicate that the world is lemanding from us the class of material required for the immediate use of its peo-ple. Food, clothing and certain trans-portation facilities roust be had for imnediate use, while other lines, such as tories and the replacement of machiners operated during the war, can be fempo-rarily deferred, awaiting adjustment of costs, and the big increase characterizing our 1920 exports of manufactures occurred in articles required for immediate

Textiles exported in the fiscal year 1920, says the bank's statement, aggregated \$485,000,000 against \$228,000,000 gated \$485,000,000 against \$328,000,000 in 1819, and only \$81,000,000 in the year preceding the war, an increase of 50 per cent, in value over last year and of 500 per cent, over the fiscal year 1814. Leather and manufactures thereof amounted in 1920 to \$292,000,000 against \$183,000,000 in 1819 and \$55,000,000 in 1814, an increase in value of 60 per cent, over last year and approximately 400 per cent, over 1814. Wood manufactures agarescated \$169,000,000 in 1820 an ingregated \$169,000,000 in 1920, in in-crease of 61 per cent over last year mineral oil exports in the various manufactured forms aggregated \$46,000,000 in the fiscal year 1220, an increase of 21 per cent. over the immediately preceding year; manufactures of rubber \$70,000,000. on increase of 58 per cent. over last year and more than 400 per cent. over 1914. while automobiles capped the climaxe with an increase of 100 per cent. as com-pared with last year and 700 per cent. as compared with 1814.

Transportation is an absolute requirement of commerce, and the present de-mand for transportation facilities for im-mediate use is evidenced by the fact that the export of commercial cars in 1920 was \$42,000,000 against \$23,000,000 one year ago and only \$1,000,000 in 1914; the alue of cars for steam railways exp in 1920 was \$54,000,000 against \$22,000,000 one year earlier, and \$7,000,000 in 1914, and of locomotives exported in 1920 is six, had acquired a new aunt or uncle \$43,000,000 against \$25,000,000 one year by marriage, the brothers and sisters of ago and \$2,500,000 in 1914. The railways the marriage are appropriate to wait hemselves are apparently having to wait until the railway world can catch its breath after the war, for the exportation

of rails, track material, ties, and car-wheels show no increase over 1819 despite the fact that cars and locomotives show an increase of 80 Her cent, in value ex-ported in 1820 commared with 1812. the immediate requirements of man characterizing the world's demands upon us. Of cotton goods alone the exports in the fiscal year just ended were \$564.

1000.000, or an average of a million deliara of a day, against only \$22.000,000 one year a gar of this increase is due to higher the part of this increase is due to higher attractions the increase in duantities exported is very large. Cotton cloths show a total part of the rear 1920 of \$87.000.000 yards against \$70.000.000 yards one year carbon against \$70.000.000 yards one year carbon against \$70.000.000 yards one year carbon against \$70.000.000 in 1914 while knit there are increases, in values and fittings, and siructural iron and steel fittings. In other particulars it is apparent that the immediate requirements of man are characterizing the world's demands upon they left the key in the designated place of this increase is due to higher at the strength in fact it is not attractive tea room where they at the strength in fact it is not attractive tea room where they at the strength in fact it is not attractive tea room where they at the strength in fact it is not attractive tea room where they at they left the key in the designated place. When she returned she found it and entered, taking the key with her. What is very large. Cotton cloths show a total enjoyed herself unfeignedly. If she felt any quaims because of the inappropriate and in the strength in the designated place. When she returned she found it and entered they could not get in. She they returned they could not get in. She was seen sitting by an upstairs window against 570,600,000 yards one year earlier, and tis,600,600 in 1914, while knit reading. The doorbell was rung until they returned they could not get in. She was seen sitting by an upstairs window against 570,600,000 yards one year earlier, and tis,600,600 in 1914, while knit reading. The doorbell was rung until they returned they could not get in. She was seen sitting by an upstairs window against 570,600,000 yards one year earlier, and tis,600,600 in 1914, while knit reading. The doorbell was rung until the designated place.

One of the could not get in. She was seen sitting by an upstairs window against 570,600,000 against 5270,000 on year earlier and only \$52,00,000 against \$27,00,000 on year earlie

THE DORTEOUS & MITCHELL CO.

PROVERB-He that does not mix with the crowd knows nothing.

The New Ginghams

School days are near at hand-time to think of new School Dresses. Our showing of new Fall Ginghams will appeal to shoppers who look to Ginghams for practical utility, combined with becoming patterns of color. The plaids are in . well-nigh infinite variety; then there are new checks, and combinations of plaids and checks; the striped ginghams show stripes both plain and in compound effects. A fascinating array -and new.

Dress Ginghams at 49c

At this price we make an excellent showing of Dress Ginghams in the staple stripes-27 inches wide and in a good range of colors, at 49c a yard.

Dress Ginghams at 59c

Dress Ginghams in all the best known makes, such as Bates, Amoskeag, etc.-27 inches wide, in a splendid range of plaids, stripes, checks and plain colors, at 59c a yard.

Dress Ginghams at 65c

Zephyr Ginghams, 32 inches wide (note the width) in all the newest color combinations, in plaids, stripes and checks, at 65c a yard.

Zephyr Ginghams at 95c

These are the aristocrats of the Gingham family, full 32 inches wide, and in an excellent range of attractive color combinations, in plaids and stripes, at 95c a yard.

Renfrew Devonshire Cloth 65c

We recommend and sell Renfrew Devonshire Cloth, a yarn-dyed fabric, 32 inches wide. This fabric is durable, reliable and economical; it will outwear Galatea Cloth for Wash Suits or Children's School Dresses, at 65c a yard.

In days gone by it was Private Seal that quenched your thirst, steadied your nerves after a hard day's work, built you up in periods of recuperation.

Private Seal, as mellow and tasty as ever, is still at your service. Tests have shown that its taste and body-building qualities remain unchanged.

And why not?

The same high quality of hops and malt still are used. It is still brewed and aged with the same infinite care. It is as good as ever.

Compare it with the substitutes. Then order a case TODAY from your grocer or dealer, as usual.
